change the way

"Making Money Online is Easy Right? It Can Be if You Know What You're Doing"

TheWealthyPages.com will teach you how to earn money online, and best of all, it's free. We've reviewed all of the top "making money" programs online and have created this site to help you determine which products and services will actually help you make money online!

Lesson #1: How Does Someone Make Money Online?

There are many ways to make money online, but the most common, and most lucrative way to make money online is to sell products for companies willing to share the profits with you. The process of marketing to people online is called "Internet Marketing" and it is a multi billion dollar industry. Hundreds of thousands of people, just like yourself, are making money online everyday by partnering with companies who pay commissions based on sales that you help generate.

This sounds difficult but it's not because these companies have "Affiliate Programs" setup for their partners (Affiliates). You can partner with thousands of companies online and start selling their products in literally minutes. So how do you start selling a companies products as an Affiliate? Simple, all you need to do is send visitors to their websites. This sounds simple, and it is, but finding the right kind of traffic and enough of it is more difficult. Websites like WealthyAffiliate.com teach people techniques to drive traffic to Affiliate sites and earn HUGE dollars online. Making \$500 a day online is quite normal and you can get started very quickly if you know the right techniques.

Lesson #2: What If I have No Experience?

The most common misconception about Internet Marketing is that only people with good computer knowledge and marketing skills can take part. **This is NOT the case.**

- You **DO NOT NEED** a website
- You **DO NOT NEED** your own product
- You **DO NOT NEED** any previous experience (none)

What you will need is a guide to help you learn how to get started. The top marketing website online is called the Wealthy Affiliate University, and for a few dollars a month you can learn from the pro's and work with thousands of other aspiring Internet Marketers.

Lesson #3: Be careful who you choose to learn from

Everyone has heard of being "Scammed" on the Internet, and although this is only somewhat true, many people have learned about making money online from companies who do not have good reputations in the Internet Marketing world.

There are many companies out there that offer good techniques and strategies but with little support or coaching. A program like the Wealthy Affiliate University offers both great techniques and support. If you are just getting started with Internet Marketing, support is one of the first things that you need to look for when choosing a guide. Also, steer clear from anything that offers you "Overnight" success, or "Get Rich Quick" programs.

There is no such thing as "Getting Rich Quick" on the Internet. It doesn't matter what you hear, you will never make money on the Internet overnight. Internet Marketing is a real

Internet marketers and website developers work. It is truly going to level the playing field between those people that can't (or don't want to create websites) with those whom are advanced web developers. We created Site Rubix with Internet marketers in mind, and the functionality available to you is nothing short of "Amazing"!

Release Date October 9th 2007
